EXECUTIVE SUMMARY

Accomplished **Senior iOS Developer** with **10+ years** designing, developing and maintaining enterprise-grade production applications in **Swift, SwiftUI and UIKit** (including SwiftUI/UIKit interoperability). Strong in **Swift Concurrency** (async/await, Tasks, structured concurrency), **Clean Architecture, MVVM and VIPER**, and modular, reusable component design. Experienced integrating **RESTful APIs** with robust error handling, and implementing **secure authentication** using **Keychain, OAuth 2.0/OpenID Connect, Face ID/Touch ID (LocalAuthentication)**, biometrics and custom security SDKs under strict regulatory compliance (Barclays banking). Implements **Deep Links/Universal Links** and manages dependencies via **Swift Package Manager**. Drives architecture/code reviews, 80%+ unit test coverage (XCTest/XCUIUnit), Jenkins CI/CD, and App Store/TestFlight releases, and mentors engineers across Sports & Ticketing, Travel, FinTech/Banking, Casino Gaming, and Healthcare EMR domains.

TECHNICAL CAPABILITIES

Swift & UI Frameworks:	Swift, SwiftUI, UIKit (incl. SwiftUI/UIKit interop), Objective-C, Custom iOS Frameworks/SDKs, Auto Layout, Dynamic Type, Reusable Components
Concurrency & Memory:	Swift Concurrency (async/await, Tasks, structured concurrency), Combine, ARC, Memory Management, Retain Cycle Resolution
Architecture & Design:	Clean Architecture (Presentation, Domain, Data), MVVM, VIPER, MVC, Repository Pattern, SOLID Principles, Modular Design, System Design
Networking & Navigation:	RESTful APIs, SOAP Web Services, Deep Links & Universal Links, Error Handling, Caching, WebViews
Security & Auth:	Keychain, OAuth 2.0 / OpenID Connect, Face ID / Touch ID (LocalAuthentication), Biometric Auth, Custom Security SDKs, Secure Token Storage
Persistence & Integrations:	CoreData, Firebase (Analytics, Crashlytics, Remote Config), New Relic SDK, Push Notifications
DevOps, Tools & Testing:	Xcode, XCTest, XCUIUnit, Git, Jenkins CI/CD, Swift Package Manager, App Store Connect, TestFlight, Jira, Agile/Scrum

PROFESSIONAL EXPERIENCE

Globant — Technical Architect / Lead iOS Engineer

Oct 2024 – Present | Pune, India

Ahlan – Sports & Events Ticketing Platform (Native iOS)

Tech: Swift, SwiftUI, Custom iOS SDKs, Clean Architecture, REST APIs | App Store: Ahlan

- Architected scalable front-end and core iOS framework structures using **Clean Architecture** separating Presentation, Domain, and Data layers with modular Swift components.
- Engineered dynamic ticketing accessibility workflows including Accessibility Request Form, wheelchair/companion seating selection, and proof upload mechanisms using native UIKit and SwiftUI.
- Designed public SDK APIs to be scalable, maintainable and **backward compatible**, so consuming apps could adopt new releases without breaking changes.
- Built modular, highly reusable custom UI SDK components supporting responsive layouts and native **Right-to-Left (RTL)** language formatting directly from Figma designs.
- Integrated RESTful APIs with robust error handling, structured data repositories, and asynchronous thread safety using **Swift Concurrency** (async/await, structured concurrency) and Combine.
- Implemented **Deep Links and Universal Links** for direct navigation into ticketing and seating flows, and managed internal/third-party dependencies using **Swift Package Manager**.

Travel & Destination Booking Application (Native iOS)

Tech: Swift, SwiftUI, MVVM + Clean Architecture, Custom iOS Frameworks, REST APIs

- Architected and developed a full-featured travel destination booking framework using Swift and SwiftUI.
- Implemented MVVM and Clean Architecture patterns for modular code separation across core UI controls, business logic layers, and backend endpoints.
- Optimized UI rendering, custom image caching SDK modules, and multi-screen state transitions for smooth navigation and media playback.

RedSea Luxury Destination Booking (SwiftUI)

Tech: SwiftUI, Swift, MVVM + Clean Architecture, Custom Analytics SDK

- Architected luxury destination booking interfaces in SwiftUI with integrated native analytics tracking frameworks across onboarding and resort checkout workflows.

Light & Wonder — Lead iOS Engineer / Senior Software Engineer

Jul 2023 – Aug 2024 | Pune, India

Casino Gaming - Tropicana PA (SwiftUI & Swift)

Tech: SwiftUI, Swift, MVVM, New Relic SDK, Firebase, Jenkins CI/CD

- Developed core UI and casino gaming SDK workflows using SwiftUI and MVVM architecture for high-performance mobile gaming applications.
- Integrated real-time RESTful APIs, New Relic SDK for live telemetry monitoring, and Firebase for remote configuration and crash reporting.
- Automated **Jenkins CI/CD** build & deployment pipelines, significantly cutting production release timelines for enterprise iOS releases.

IBM — Solution Architect / Senior iOS Engineer

May 2021 – Jul 2023 | Pune, India

Barclays Mobile Banking (BMB)

Tech: Swift, UIKit, Custom Security SDKs, Clean MVVM, XCTest, Security & Regulatory Compliance

- Architected core sign-up and **secure authentication** modules for enterprise mobile banking under strict regulatory compliance, using **Keychain** for secure credential/token storage, **OAuth 2.0** for authorization, and **Face ID/Touch ID (LocalAuthentication)** for biometric login, built with modular Swift frameworks and custom security SDKs.
- Enforced Clean Architecture and SOLID principles, boosting unit test code coverage to **80%+** using XCTest and XCUITest frameworks.
- Led technical code reviews, conducted vulnerability assessments, and mentored junior iOS developers in enterprise architecture best practices.

Magna Infotech (Client: Tata Consultancy Services - TCS) — Senior iOS Developer

May 2018 – May 2020 | Pune, India

Go365 (Humana Inc)

Tech: Swift, iOS SDK, REST APIs, Web Service Integration

- Developed healthcare wellness workflows connecting native iOS application frameworks with web journeys via RESTful APIs for leading health insurer Humana.
- Managed seamless app-to-web transitions and acted in a client-facing role collaborating with product stakeholders to gather technical requirements.

Ohum Health Care Solutions Pvt. Ltd. — Consultant (iOS Developer)

Feb 2016 – Apr 2018 | Pune, India

OhumDoc (iPad Clinical EMR Application)

Tech: Objective-C, Swift, AFNetworking, VistA EMR, UIKit, iOS SDK

- Transformed clinical workflows onto iPad application frameworks interfacing with VistA EMR system to enhance patient safety and clinical outcomes.
- Remodeled UI screens based on physician demands, optimized networking via AFNetworking, and resolved clinical data vulnerabilities.

Earlier Notable Mobile Projects

2014 – 2016

- **GoBarber** (Swift, MapKit, iOS SDK, REST APIs): Developed barber discovery native app featuring MapKit navigation, real-time distance estimates, and appointment booking flow.
- **OurNature** (Objective-C, SQLite, MapKit, CoreLocation): Built offline-first GPS tree tracking app with SQLite storage and photo upload sync for local municipal bodies.
- **Binsta & ExpoExhibitors** (Objective-C, SOLID): Built real-time social chat, offline data synchronization, and push notification alerts for event management.

EDUCATION & PROFESSIONAL CERTIFICATIONS

Master of Computer Applications (MCA)

Nowrosjee Wadia College, Pune | Score: 63.25% (2014)

Bachelor of Science (B.Sc - Mathematics)

Nowrosjee Wadia College, Pune | Score: 71.36% (2011)

- iOS Design Essentials – Issued by IBM
- MVVM Design Pattern in iOS using SwiftUI – Udemy
- Swift Intermediate & Advanced – Udemy
- Level Up in Auto Layout – Swift & iOS (Udemy)
- Build ChatGPT App for iOS/macOS with SwiftUI – Udemy
